

## RED WOODY 5'6" - 1.75" - 22"

We had so much excitement over the RED WOODY we brought it back completely unchanged for 2009! Got a smaller wake? Are you a bigger rider? Have no fear, this board was made just for you! This board rides as good as it looks. Bust turns with our super fast concave bottom and cruise down the line with our proven Vortex Speed Channel. It also features Inland's Progressive Edge and Wood-Loc system. This board will keep you riding in style for years with its Epoxy Infused Technology, EVA padded deck, rear kick pad and big graphics all on a beautiful wood board. You'll want to hang this board on the wall but it was made to be ridden! First timers to the most advance will love ridding it.

## BLUE LAKE - QUAD FIN 5'4" - 1.75" - 21"

The BLUE LAKE, returning for its 7th season, is the one that started it all for Inland Surfer and has become one of the most dominant boards on the market. No other board gives you that true surf feeling of slashing turns and ripping the lip off the wake like the BLUE. And, because it's an Inland Surfer it features our Vortex Channel under the nose for speed lift, our Wood-Loc system for stiffness, Progressive Edge for quick turning without sacrificing speed and Epoxy Infused Technology for years of durability. You'll be stuck to the board with the cozy padded deck, rear kick pad and a Quad Fin options. One pair of Speed Line Thruster Fins are included along with fin box plugs. Add Trick Fins or Thruster Fins to give one board multiple performance characteristics. The Blue Lake Quad keeps its acceleration allowing you to go for the biggest air and the hardest carves.

## BLUE LAKE - CARBON RAILED - QUAD FIN 5'4" - 1.75" - 21"

So you like the look, and performance of a Carbon Fiber board, but just can come up with the dough to make it happen? Well, have we got a board for you! We've taken the legendary BLUE LAKE and wrapped the rails in Carbon Fiber. This provides torsional stiffness, rigidity and protects the edges of the board from dings and dents. Just like the BLUE LAKE, it features our Epoxy Infused Technology, Vortex Channel, Progressive Edge, Wood-loc system, padded deck with kick and a Quad Fin setup. One pair of Speed Line Thruster Fins are included along with fin box plugs. Add Trick Fins or Thruster Fins to give one board multiple performance characteristics. You won't see another board like it on the market! The Blue Lake Quad keeps its acceleration allowing you to go for the biggest air and the hardest carves.
