

4-SKIM "BLACK PEARL YELLOW" - TRI FIN

If a skim-shaped board is more your style, then the 4-Skim Black Pearl belongs under your feet. With a flair for the dramatic, it comes in a beautiful black metallic metal flake and a big yellow logo. The board delivers snappy turns, great down the line speed and a shape that can spin for days. It comes with a 1" fin located in the center of the tail but you have the option to add two more. Run the board as a tri-fin, dual-fin or single- fin. Just like all Inland Surfer boards, it's constructed with the durable Epoxy Infused Technology, laminated Wood-Loc system which makes it super rigid for such a thin board and it'll fit in any board rack. It features a full EVA deck to keep your feet planted and a rear kick to push your airs to new heights. At a mere 5 lbs, the board can be easily hucked in to ollies, shovits and big spins.

4-SKIM "BLACK PEARL WHITE"

4'.5"- 5/8 - 20.5"

Our first original 4-Skim black pearl will be offered again this year to round out our 4-skim line of epoxy boards riders want. The board delivers snappy turns, great down the line speed and a shape that can throw shuvets all day long! It comes with a 1" fin located in the center of the tail. Just like all Inland Surfer boards, it's constructed with the durable Epoxy Infused Technology and laminated Wood-Loc system which makes it super rigid for such a thin board and it'll fit in any board rack. It features a full EVA deck to keep your feet planted and a rear kick to push your airs to new heights. At a mere 4 lbs, the board can be easily hucked in to ollies, shovits and big spins.

4-SKIM "MOSS"

4'2"- 5/8 - 20.5"

Our new Team Competition MOSS 4-Skim. This is the board our team riders want. The board delivers snappy turns, great down the line speed and a shape that can throw shuvets all day long. It comes with a 1" fin located in the center of the tail and new sharper edges to hold you in when going backwards. Just like all Inland Surfer boards, it's constructed with the durable Epoxy Infused Technology and laminated Wood-Loc system which makes it super rigid for such a thin board and it'll fit in any board rack. It features a full EVA deck to keep your feet planted and a rear kick to push your airs to new heights. At a mere 3.5 lbs, the board can be easily hucked in to ollies, shovits and big spins. Who knows, maybe it will be you who lands the first wakesurfing kick flip!
